<b>GROWTH STAGE</b>		<b>PRODUCT</b>	<b>REC. RATE**</b>	<b>COMMENTS</b>
<b>Hook Stage 35-50 DAP*</b>		<b>Metalosate® Calcium®</b> <b>Metalosate® Big 5™</b> <b>Metalosate® Magnesium</b>	16 oz/ac 16 oz/ac 16 oz/ac	<ul style="list-style-type: none"> <li>• Providing key nutrients for photosynthesis during periods of rapid vine growth</li> <li>• Supporting soil fertility program if root uptake is delayed</li> <li>• Supplying key nutrients needed to maximize tuber set</li> </ul>
<b>Row Closure/ Bloom 55-70 DAP*</b>		<b>Metalosate® Calcium®</b> <b>Metalosate® Big 5™</b> <b>Metalosate® Magnesium</b>	16 oz/ac 16 oz/ac 16 oz/ac	<ul style="list-style-type: none"> <li>• Continued supply of nutrients to sustain tuber set</li> <li>• Support tuber set/quality and strengthen cell walls</li> </ul>
<b>Tuber Bulking 75 -90 DAP*</b>		<b>Metalosate® Calcium®</b> <b>Metalosate® Big 5™</b> <b>Metalosate® Magnesium</b>	16 oz/ac 16 oz/ac 16 oz/ac	<ul style="list-style-type: none"> <li>• Metalosate nutrients aid carbohydrate transfer needed for bulking</li> </ul>
<b>For use with all applications of Metalosate® Powered by Albion Technology</b>		<b>LEAF-LOCK</b>	16oz /32oz 100 gal of water	<ul style="list-style-type: none"> <li>• Water conditioning agent, non-ionic surfactant, drift reduction and anti-foaming agent.</li> </ul>

\* DAP - Days After Planting. DAP recommendations are a rough estimate based on typical production. It is subject to growing region and weather conditions.

\*\* Recommended 20-30 gallons water per acre minimum for all foliar applications listed unless otherwise noted.

\*\*\* Environmental conditions may dictate the need for more or less water/nutrients or a change in application timing. Therefore, this program and the recommended amounts are only a suggestion. A good common-sense approach is always best.
